DETAILED ACTION

Allowable Subject Matter

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant claims a method for defending against a denial of service attack perpetrated by a TCP stateless hog, including the steps of: receiving a TCP connection request from a network source and establishing a TCP connection in response thereto; sending a keep-alive packet associated with said TCP connection to the network source, wherein said keep-alive packet comprises an invalid sequence number; receiving a response to the keep-alive packet associated with said TCP connection from the network source; and determining whether the network source is a TCP stateless hog based on the received response. Sending an invalid sequence number to determine whether the network source is a TCP stateless hog was not found in the prior art. Clavister discloses a similar method, as outlined in the prior office action, but applicant produced proof that his invention was conceived and reduced to practice on November 1, 2002, as shown in Exhibit 3 of the affidavits, thus Clavister is not prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
